## Telegraphic Tidings

### WASHINGTON MATTERS.

**SUPREME COURT VACANCY.**  
WASHINGTON, May 22.—In judicial and political circles it is confidently stated that the president will leave to fill one, but two vacancies on the supreme bench of the United States, the second one being the retirement of Justice Miller. Who will fill the present empty chair is still a matter of conjecture, with all the probabilities in favor of Attorney General Miller, but as to the place not occupied by Justice Miller no name has as yet been suggested to the president save that of ex-Sec. of War George W. McCrary, and his sponsor was the justice himself.

At present the justice believes he will retire early in December and he is really most anxious that his friend McCrary should succeed him.

Thirty years ago when Judge Miller was practicing law in Keokuk, Iowa, he took McCrary into his office and there laid the foundation for the broad legal knowledge which McCrary is now credited with having in his possession. Mr. McCrary is now general counsel to the Atchison, Topeka & Santa Fe railway.

**AN OFFICE SEEKER'S TROUBLES.**  
Henry W. Rogers, a middle aged man, came here on the 4th of March for a consulate. He was locked up last night in the 12th street station house as a vagrant. He had nearly \$20 in coppers and 5 cent pieces in his clothes, the result of his solicitations on the street.

He was taken before Judge Miller in the police court one day last week, and gave his personal bond to get out of town, but he was sure of getting his position in a few days more, so he stayed.

**ARMY CHANGES.**  
It is now believed by many that Col. W. D. Whipple, at present adjutant general of the division of the Atlantic, with headquarters at Governor's island, at New York harbor, will succeed Adj. Gen. Drum, when the latter retires next Saturday. Col. J. C. Kelton, the present assistant adjutant general, is also strongly backed for the place, and for a few days it was the opinion of the army people that he would be selected for the place. The fight seems now between these two officers. The record and endorsements of the candidates are now before the president. He will make his selection this week.

**REMOVED CABINET CHANGES.**  
A rumor was again afloat last night to the effect that changes in the cabinet are about to take place as follows:  
The present attorney general, Mr. Miller, is to be appointed associate justice to fill the vacancy made by the death of Stanley Matthews.

Mr. Tracy is to be transferred from the navy to the justice department.  
Ex-Senator Thomas C. Platt is to be appointed secretary of the navy.  
The attorney general denied any knowledge of a plan to put him on the supreme bench.

**Another Arkansas Anecdote.**  
LITTLE ROCK, Ark., May 20.—Advices from Forrest City state that A. M. Neely, the negro whose quarrel resulted in a riot, in which three men were killed, was killed by a mob yesterday. Neely's father and brother, took refuge in a vacant building. Every effort was made to get Neely, but it proved unsuccessful, as the negroes were well barricaded.

Acting Sheriff Izard persuaded old man Neely and his other son to come out, promising them safe conduct to jail and a fair trial. A. M. Neely did not go. The sheriff's party was not more than fifty yards distant with the two prisoners, when a number of other members of the posse raided the building, where Neely was discovered, secreted under the floor, and he was killed with bullets.

This last killing created a great deal more excitement, and the people were afraid of a raid on the town by the Negroes. The acting sheriff wired Gov. Eagle and asked that the militia be ordered there. Gov. Eagle thought he was better able to judge of what was needed by being on the ground, so he took the first train to Forrest City and is now there and will remain until quiet is restored.

The cause of all the trouble was the determined attempt of the Negroes to elect two of their race to membership on the school board in place of the two white candidates. The white people claimed that the "niggers" already had sufficient representation and charged that they were trying to obtain control of the board in order to manage the school to suit themselves.

Neely was a prominent Republican. He was a member of the state committee and of the executive committee, and had secured the recommendation of that body for appointment as register of the land office here.

It has been learned that the bullet which killed Sheriff Wilson was not fired by Neely, as at first supposed, but by one of the shots fired wildly by Marshal Tolbre as he was falling after being fatally wounded by Tom Farham.

**The Cherokee Strip.**  
CEDARVILLE, Kas., May 22.—A delegation of Osages, accompanied by W. H. Matthews, attorney and interpreter, arrived on their way from here to Tahquah to meet in council with the Cherokees in regard to the government bill for the opening of the Cherokee lands.

The delegation was designated by Chief Mayes, of the Cherokees, in a letter sent to the Osage council specifying by name the ones he wanted sent.

They are to a man opposed to selling any of their lands or to any scheme for allotment. They are staunch friends of the cattlemen and will oppose anything that will work against the fences they have. They take with them the patents to their lands and other documents and are prepared for a fight.

York, a distance of 3,148 miles, in eight days and one hour, an equivalent of six days, two hours from Eastport to New York. Taking the four hours which the steamer was delayed by heated journals, the actual time between Eastport and Sandy Hook light ship would be five days, twenty-two hours and thirty minutes, or better than the great voyage of the new ocean greyhound, City of Paris.

**The Asylum Investigation.**  
CHICAGO, May 22.—The most horrible revelation made in the investigation of the Chicago public insane asylum was that reached yesterday in the testimony of George Hill, a locomotive engineer, now employed on the Lake Shore & Michigan Southern road. He was admitted to the institution in January, 1888, suffering from slight mental derangement, and was discharged as cured in May. When he went to the asylum an attendant named Lott asked him if he was insane. Hill said he was not. "Well," replied Lott, "can't you make your own mind up, saner than you are now?" Another attendant named Julian ordered him to sweep out a room, and on his saying he had not come there for that purpose knocked him, kicked him in the body and mouth, knocking two teeth out. Hill tried to cover his face by getting his head beneath a bench, when Julian turned the bench over, breaking Hill's arm. Hill rolled up his sleeve in court and showed a huge lump where the ends of broken bones badly joined stood out. Hill said a new patient named Levy was brought in during this awful recital. Several other witnesses testified to the brutality of the attendants, miserable quality of food, etc. County Physician Todd testified that Robert Burns, whose death resulted in this investigation, did not die of consumption, as was stated by Supt. Kiernan in his certificate of death.

**El Paso Dots.**  
EL PASO, May 22.—A committee of prominent citizens from Atlanta, Ga., of which ex-Gov. Bullock is chairman, passed through here on the way to the City of Mexico to invite President Diaz to attend the Piedmont exposition, which opens in October.

Two celestials were caught by the custom house guards attempting to cross the railroad bridge from Juarez last night. They were taken before United States Commissioner Townsend, who ordered a deputy marshal to reconduct them into Mexico.

**A College Burned.**  
DES MOINES, May 20.—The Lutheran Norwegian college at Decorah burned last night. The grounds and building cost \$160,000.

**Progress.**  
It is very important in this age of vast material progress that a remedy be pleasing to the taste and to the eye, easily taken, acceptable to the stomach and healthy in its nature and effects. Possessing these qualities, Syrup of Fies is the perfect laxative and most gentle diuretic known.

**A GREAT SCHEME.**

The Colorado River to be Paralleled by the World's Scenic Route.

DENVER, May 22.—The Denver, California, Canon & Pacific railroad company, recently incorporated, will send out an expedition to-night to the City of the Green River Junction, on the Denver & Rio Grande Western, for the purpose of surveying the Colorado river country with the intention of running the line down that stream from Grand Junction to tide water. The management of the company have already six boats and supplies awaiting the expedition at Grand Junction. They have two corps of surveyors and a photographer to accompany the party.

The fact that the company has completed a survey to the mouth of the Grand river, a distance of 160 miles, over which an average grade of about seven feet to the mile has been secured, is in part information to railroad men. The engineer reports no canon work, only one bridge across the Grand and one tunnel a half a mile long through sandstone.

The government surveys show that the average grade down the Colorado river does not exceed five feet to the mile. The projectors claim that this line will have advantages of an easy grade over other grades being in excess of 100 feet to the mile. The success of the enterprise depends upon the feasibility of the road, and if the survey proves satisfactory it will then be a question of the business which the road will do.

The line starts in one of the largest coal fields in Colorado and terminates in a market where coal is higher than in any other market in the world. The road will run through the greatest scenic country in the world, with canons 6,500 feet deep and rich in minerals.

Major Powell states that if formations mean anything it will be the greatest silver producing country of the world. Valuable minerals have within the last few years been discovered in southern Nevada, southern Utah and southern Arizona in the canons and contiguous to the canon of the Colorado. Rich and apparently inexhaustible deposits on the Colorado river, between the mouth of the San Juan and the head of the Colorado, have been discovered. Major Dutton reports all varieties of marbles, granites and slates in the canon, and Philadelphia capitalists have recently purchased extensive salt mines, 300 to 400 feet thick, near the mouth of the Virginia on the Colorado.

The country lying contiguous to the Colorado or the higher mesas is well timbered and the valleys susceptible of high cultivation. Cotton, tobacco and figs are being raised successfully through this whole country.

The road will cross and connect with the Atlantic & Pacific at Yuma, which lines, in connection with the Denver & Rio Grande and Midland, will form a through line from ocean to ocean over the lowest grade across the continent.

Chief Engineer Robert B. Stanton has charge of the survey on the Colorado, and Frank C. Kendrick had charge of the survey on the Grand river. President F. M. Brown of the company will personally oversee the work on the Colorado river and accompany the expedition.

The prevalence of scrofulous taint in the blood is much more universal than many are aware. Indeed, but few persons are free from it. Fortunately, however, we have in Ayer's Sarsaparilla, the most potent remedy ever discovered for this terrible affliction.

## SUPREME COURT OPINION.

Notaries Public Not Qualified to Act in U. S. Cases.

WASHINGTON, May 22.—The opinion of the United States supreme court, in the case of the United States vs. John D. Hall, was yesterday the subject of earnest discussion among the officers of the general land office. One of the points at issue was that Hall had made oath before a notary public. The supreme court decided that where an oath is required by the United States statute the oath can be administered only by an officer of the United States. Hence a notary public, being a state officer, can not administer an oath to a United States official except where the statute specially state that oath may be made before such state official. This opinion, it is believed, seriously affects the status of more than 100,000 cases in the mineral division of the general land office. Deputy mineral surveyors have for several years, it is said, sworn to the correctness of their statements before notaries public. During the last four years a large number of cases under the general land laws have been received for patent at the general land office, where final proof was not made before the officer designated by law for that purpose. Where no error was found they have been allowed to go patented. This was first adopted by Secretary Vicks. The opinion of the supreme court has created alarm, and the request for an interpretation of section 2335, Revised Statutes, has been sent to Assistant Attorney General Shields, with particular reference to the supreme court decision and its effect upon the pending cases in the general land office.

**The Arizona Robbery.**  
TUCSON, A. T., May 21.—On the 11th instant, near Cedar Springs, A. T., a gang of twenty ambushed robbers waylaid Paymaster Wham and escort on the way to Fort Thomas with \$29,000, drove off the escort and wounding most of them, secured the money and escaped. There has been a vigorous pursuit of them.

A Fort Thomas special says: M. E. Cunningham, the leader of the gang who robbed Paymaster Wham, was arrested this morning at El Centro by the negroes, Frankie Stratton, who was at the scene of the robbery. She says that she talked with him just before the robbery. Cunningham is from New York, is engaged in the stock business and is surrounded by a gang of cattle thieves. Seven of the robbers are old offenders and the other five are "kids." All live in Graham county. It is now definitely known that two of the robbers were wounded. Marshal Meade and his posse are on the go night and day.

Cyclone Bill, who was arrested at Clifton, was brought in here last evening by Lieut. Burke and Breckinridge, the United States marshal. Both Cunningham and Cyclone Bill have been identified by some of the men of the paymaster's escort and the woman, Frankie Stratton, being sent to the jail.

Major Wham was emphatic in his eulogy of the good fight made by the soldiers. He said he fought through the war in the army of the Cumberland and never saw a lot of soldiers come near doing their whole duty. They returned the fire promptly and fought manfully, but much better than we would could be expected of any soldiers not used to being under fire. They demonstrated that Uncle Sam has men in the army—even among the colored troops—who will fight when an opportunity offers.

The major thought that surely the government would not hold him responsible for the loss of the money after the gallant fight that was made.

**Small Pox.**  
SPOKANE FALLS, May 22.—Small pox is reported to be raging among the Okanogan Indians. Physicians have been sent to vaccinate the tribe. It was also rumored among the Indians near Sprague, a town on the Northern Pacific road, west of here, but this rumor is denied.

**Inflammation of the Kidneys.**  
R. C. Harris, Bazaar, Chase Co., Kas., writes: I have been afflicted with chronic inflammation of the kidneys. I suffered so much pain that I could not lie on my back or lean back against a chair. My water also contained a chalky sediment. I tried many remedies but could get no relief. I then took two Alcock's Plasters and put one over each kidney, making them meet on my back bone. These plasters, strange as it may seem, cured me in a week. All soreness was gone, and my urine was natural.

Mr. Moore, the postmaster at Bradshaw Va., after reading an advertisement of Chamberlain's Colic, Cholera and Diarrhea Remedy, concluded to try a small bottle of it. He says: "I used it in two cases for colic and three for diarrhea with perfect satisfaction. One dose gave relief in every case but one, that was had case of colic and required the second dose. I have handled a great deal of patent medicine as agent and for my own use, but never tried any that gave as good results as 'Chamberlain's Colic, Cholera and Diarrhea Remedy.' For sale at 25 and 50 cents per bottle by C. M. Creamer.

**Take Hood's Sarsaparilla 100 Doses One Dollar**

The Chief Reason for the great success of Hood's Sarsaparilla is found in the article itself. It is merit that wins, and the fact that Hood's Sarsaparilla actually accomplishes what is claimed for it, is what has given to this medicine a popularity and sale greater than that of any other remedy. Hood's Sarsaparilla cures Scrofula, Salt Rheum and all Humors, Dyspepsia, Sick Headache, Biliousness, overcomes Tired Feeling, creates an Appetite, strengthens the Nerves, builds up the Whole System. Hood's Sarsaparilla is sold by all druggists. \$1.50 per bottle. Prepared by C. I. Hood & Co., Apothecaries, Lowell, Mass.

## GEORGE W. HICKOX & CO
